

Programming Skills and Software

Used to program in: ALGOL, BASIC, PASCAL, FORTRAN and a little bit in C. Now he mainly uses Wolfram's Mathematica for research purposes. In the past has been involved in design and development (for example, Graph, TSP-SOLVER and NewGraph), and since recently NeoGraph.

Besides he was working on various engineering and/or practical projects covering the the following topics: electronic intelligence, power grid networks, banking software (multilateral compensation), etc. For this aim he used besides mathematics his programming skills.
